PROFESSIONAL SUMMARY

Backend Developer with 8 months of professional experience (Feb 2026 – Present) and a 4-month Java internship, building and maintaining backend services for a multi-tenant enterprise ERP product using Java, Spring Boot, Grails/Groovy, Hibernate and PostgreSQL. Hands-on with REST API development, ORM-based data access, Gradle builds, SQL query optimization, debugging and regression testing. Strong grasp of OOP and SOLID principles, with a focus on writing clean, maintainable code and improving existing services without breaking stable behavior. Eager to learn and grow in high-performance backend engineering.

TECHNICAL SKILLS

Languages: Java, Groovy, SQL, Python

Frameworks & ORM: Spring Boot, Spring Framework, Grails, Hibernate / JPA, GORM, JDBC

Backend Concepts: RESTful API design, OOP, SOLID principles, MVC architecture, service-layer design, transaction management, multi-tenancy

Databases: PostgreSQL, MySQL — joins, aggregations, criteria queries, query optimization, data validation

Build, Tools & Practices: Gradle, Maven, Git, GitHub, Linux, unit & regression testing, debugging, CI awareness

Logging & Web: OpenSearch, Logstash, Vector.dev, Grok, Regex | HTML, CSS, JavaScript

PROFESSIONAL EXPERIENCE

Software Developer (Backend) *Feb 2026 – Present*

Vyoog Information Technology, Coimbatore

- Develop and enhance backend services for a multi-tenant ERP product for the foundry industry using Java, Spring Boot, Grails and Groovy across Inventory, Sales, Finance and Reporting modules.
- Build and maintain REST endpoints and service-layer business logic, applying OOP and SOLID principles to keep modules clean, reusable and maintainable.
- Implemented inventory/stock transaction workflows — inward/outward processing, aging analysis and Weighted Average Cost (WAC) valuation — with transactional consistency across modules.
- Developed procurement and outsourcing (job-work) workflows, including Job Contracts with server-side business validations.
- Built accounting backend logic for Trial Balance, Profit & Loss and Balance Sheet; debugged and resolved opening-balance and closing carry-forward discrepancies in existing services.
- Optimized data access with PostgreSQL, Hibernate criteria queries and GORM; wrote SQL for data validation and production troubleshooting.
- Generated PDF/Excel reports (invoices, Bill of Materials), verifying computed values against business rules; regression-tested workflows before release.
- Work with Gradle-based builds, Git/GitHub version control in a Linux environment, and collaborate with functional and QA teams to analyze requirements and ship features.

Core Java Developer Intern *Mar 2025 – Jun 2025*

Secure IT Solution, Chennai

- Automated OpenSearch data management with Python scripts — index templates, data streams and index/cluster access permissions.
- Built a log-parsing pipeline using Logstash and Vector.dev with Regex/Grok patterns, and benchmarked both tools for throughput and performance.
- Implemented Dead Letter Queue (DLQ) processing to reprocess failed messages, improving pipeline reliability.
- Designed automated SMTP email alerts to detect missing indexes/aliases, enabling proactive issue resolution.

PROJECTS

- **WebPlayer** (Oct – Nov 2024) — Java, J2EE, Tomcat, HTML/CSS/JS: Multimedia web player with a Java servlet backend on Tomcat handling request routing and media delivery to a Bootstrap front end.
- **Photo Studio Management System** (Sep – Oct 2024) — Java, JDBC, MySQL: Desktop application with role-based accounts (client/photographer/admin), authentication and service listings, using an object-oriented, layered design over a relational database.

EDUCATION

B.Tech, Information Technology — Erode Sengunthar Engineering College | CGPA: 8.01 *2020 – 2024*

CERTIFICATIONS

- Java Full Stack Development — PUMO Technovation, Coimbatore
